# The Glaro Glider Bellman & Convenience Carts

6 WHEEL DESIGN OFFERS  
PINPOINT MANEUVERABILITY  
with MINIMAL EFFORT!

## The 6600 Series

**GLARO** Deluxe Bellman and Convenience Carts have a revolutionary design that enables unsurpassed, pinpoint maneuverability. These carts feature an innovative six-wheel transport system that makes them extremely easy to use. The full size, eight inch diameter, ball bearing pneumatic wheels insure that the cart will glide quietly and effortlessly throughout the interior and exterior of your building. The frame has a special baked on coating that makes these carts completely rust and tarnish proof. Even the "All Steel" chassis is coated to preserve it indefinitely.

These large capacity carts perform exceptionally well even when fully loaded. Access to small elevators and narrow corridors has never been easier. Extra maneuverability and a non-scuff soft bumper help prevent injury to residents as well as damage to walls, door frames and furniture.

**Optional Side Containment Rails** snap securely in place, quickly and easily. They attach to the cart when needed and remain locked in place until intentionally removed. No tools are required.

Glaro manufactures a full line of Bellman & Utility Carts and an extensive selection of other fine lobby furnishings.
