EXTENDA-BARRIER POSTS with 7' STRAPS

Crowd Control Systems

Extenda-Barrier™ 7 Foot Crowd Control Posts

- Heaviest Posts in the Industry
- Slow Retracting Safety Straps
- 7 Foot Strap
- 4 Attractive Metal Finishes
- 27 Designer Finishes
- Quick Ship
- Custom Heights Available

Seen worldwide, these posts are almost synonymous with the concept of crowd control systems.

The patented, spring-activated barrier straps always extend or retract perfectly to fit the exact distance between posts, creating a neat, uniform and organized appearance. The concealed (patented) breaking mechanism buffers the retraction of the internal spring, allowing these units to be safely placed anywhere, even in areas where there are small children. These posts are essential in ALL public places where guiding the movement of people, in a dignified manner, is desirable.

This versatile system offers unlimited flexibility because you can modify and reconfigure your system easily and at any time. As with all Glaro products, these Crowd Control Posts are designed to coordinate perfectly with all other Glaro products. They are in stock and ready for immediate shipment.
