- Heavy Gauge Outer Receptacle**
Available in Your Choice of 2 Metal or 27 Attractive and Durable Powder Coat Finishes
- Rust Proof Aluminum Bottoms** for maximum longevity

Unique Double Bag System

RECYCLEPRO™

RECYCLING RECEPTACLES

GO GREEN! GO GLARO! GO RECYCLEPRO!

While developing specialized receptacles at the request of the US Government for the GO GREEN initiative, Glaro designers were inspired to create "Glaro RecyclePro®" Receptacles". Glaro has successfully combined design with function to create the most attractive, durable, and versatile recycling receptacles anywhere. This Glaro collection of receptacles enables every business or property to provide its occupants and visitors with an attractive method to efficiently and conveniently recycle used items. These receptacles are 100% post consumer recyclable.

Finishes - These double wall fire-safe containers are constructed of recycled aluminum offered in satin aluminum or tarnish-proof satin brass and recycled galvanized steel with your choice of 27 powder coat finishes. Receptacle top covers are available in satin aluminum, tarnish proof satin brass, or matching powder coat designer colors.

Logos and Wording - There is no need to "apply a decal" which may eventually peel, curl, and fall off. All Glaro RecyclePro™ receptacles are permanently silk-screened with your choice of standard Glaro messages for each opening. Please specify your message for each hole (see chart below).

Single - Purpose RecyclePro™ Receptacles This series has a single inner galvanized steel receptacle and holds one poly bag to contain recyclables.

Dual - Purpose RecyclePro™ Receptacles - The "Smart" Space Saving Recycling Choice These units are ideal for separating two recyclables with one unit. They have a special retainer system that holds a separate bag under each top opening. Because there is no rigid divider each bag is free to expand into the open space within the container occupying more than half the space if needed. Emptying bags is easy. This smart and unique design allows for the most efficient use of space. It reduces the frequency and minimizes the time necessary to monitor and empty the receptacle thus saving labor costs.

- Ships in 2 to 3 days
- Specialized Heavy Gauge Seamless Hand-spun Aluminum Tops
- Professionally Silk Screened Recycling Logos/Wording Included
- Satin Aluminum and All Weather Tarnish-proof Satin Brass Metal Finishes With Clear Protective Powder Coat
