Antibacterial Wipe Dispensers, Wipes and Waste Receptacles for Convenient Sanitizing

HEALTHCARE - HOSPITALITY - FITNESS FACILITIES - EDUCATION - FOOD SERVICE
DAY CARE CENTERS - SUPERMARKETS - INDUSTRY - BUILDINGS - OFFICES - HOMES
CORRECTIONAL FACILITIES - JANITORIAL SERVICES - TRANSPORTATION - CRUISE SHIPS

Public awareness of how germs are transmitted from person to person has popularized the use of Antibacterial wipes, which help prevent the spread of germs. By strategically placing Glaro Antibacterial Wipe dispensers in the most convenient easy to find locations, they will be noticed and used more frequently. Employees and visitors value efforts to create a healthier environment with less risk of cross contamination.

Where are they used?

Antibacterial Wipe units are commonly used in private and public facilities, such as airports, train stations, bus depots, restrooms, nursery schools, food service facilities, health clubs, spas, doctors' offices, laboratories, physical therapy centers, day care centers, hair, nail and tanning salons, retail stores, hospitals, assisted living centers, offices, manufacturing plants, cruise ships, gyms, supermarkets, residential, and more.

FDA Approved Wipes – How are they sold?

Antibacterial antibacterial wipes are sold separately from the dispensing units. They are available in rolls of 900 each 8" x 6" FDA approved biodegradable wet wipes. Glaro wipes may be purchased in a case of two rolls (1800 wipes) or a case of four rolls (3600 wipes).

"Proper Use" Sign" with Adaptor Bracket

In addition to the Floor and Wall mounted Antibacterial Wipe units without a sign there is an identical model that includes an attractive silk screened sign on a handsome sintra panel. The sign announces the purpose and proper use of the Antibacterial Wipes.

Intended Use

These ammonia-free, bleach-free, deodorizing Antibacterial wipes / towelettes can be used on washable, nonporous surfaces. They are also used for personal hygiene.

Healthcare Environments

These Antibacterial wipes are gentle and designed to kill 99.9% of all common germs. Surfaces with bodily fluids should be cleaned and allowed to air dry before the use of an Antibacterial wipe.

Cleaning and Deodorizing

The sanitizing wet wipes are absorbent and excellent for cleaning soiled equipment, objects, and surfaces. For badly soiled surfaces, a second wipe is recommended for better sanitizing.

The most Unique Comprehensive Family of Coordinated Floor & Wall Mounted Wipe Dispensers with Matching Waste Receptacles

This family of contemporary products includes a floor standing combination wipe dispenser and waste receptacle. It features a top compartment for wipes and a side opening for conveniently discarding used wipes. The wall mounted dispenser holds the same full size roll of 900 wipes which can be mounted on walls, columns, or fixtures. A matching floor standing funnel top waste receptacle is designed to fit under the wall mounted unit or can be placed nearby for accommodating a larger volume of wipes and other waste. Several additional round and half round matching waste receptacles are offered so that facilities that may have additional choices to meet a variety of size and design needs.

Innovative Construction and Design

Built to last for years, our seasoned Glaro design team and craftsmen have produced a sturdy, durable, and attractive line of functional products using heavy gauge aluminum and steel with tough finishes that are easy to maintain. The Glaro Antibacterial Wipe Dispensers and Receptacles are among the most attractive in the industry. The sleek design features a touchless dispenser with a neat star-shaped opening that allows only one wipe to be dispensed with each pull.

Antibacterial Wipe Dispensers, Wipes and Waste Receptacles for Convenient Sanitizing

HEALTHCARE - HOSPITALITY - FITNESS FACILITIES - EDUCATION - FOOD SERVICE
DAY CARE CENTERS - SUPERMARKETS - INDUSTRY - BUILDINGS - OFFICES - HOMES
CORRECTIONAL FACILITIES - JANITORIAL SERVICES - TRANSPORTATION - CRUISE SHIPS

Unique Features - How It Works

The Antibacterial Wipes Dispensers/Receptacles feature a heavy weighted base for added stability. A unique double push-button mechanism keeps the cover secured to the body while wipes are pulled and dispensed one at a time. It's easy to depress the two push buttons on either side of the top cover and to lift off the top when it's time to refill with additional wipes. When done, loading the new roll the cover snaps back into place. To empty the waste compartment on floor models, lift the body off the base section and empty the trash bucket inside. Slide the body back on the weighted base unit. No inner poly bag is needed.

Custom Silk Screened Logos and Messages

Glaro is pleased to help create the message of your choice and apply a logo to the top or side of the unit to enhance branding and encourage use of the wipes to promote a safer, more germ free environment.

Finishes

Glaro offers the Antibacterial Wipe line of products in Satin Aluminum and 29 Powder Coat finishes. Solid aluminum models are available with fine satin polished finish (SA) that will not show finger prints or streaks. Galvanized steel models are available in 29 smooth or textured finishes.

Coordinated Design

The finishes shown can be matched with any existing décor. Also available in matching finishes is an array of additional Glaro products, such as umbrella stands, recycling receptacles, clothes racks and hooks, sign stands, crowd control posts, and bellman carts. Consistency of finishes allows a facility to create a customized look.

Features & Benefits

- Helps reduce risk of infection and disease with FDA approved wet wipes (not included)
- Kills 99.9% of common germs
- Helps eliminate cross-contamination
- Can be used where soap and water may not be available
- Double push button secures cover on body when pulling wipes
