## PORTABLE PEDESTRIAN GUIDANCE & CROWD CONTROL RAILING

When there is a need to organize visitors or customers, why not select the most effective system - The Glaro Elite Rail System?

Glaro, manufacturing specialists in crowd control products for over 65 years, proudly introduces the "Elite Rail System" - the next generation of pedestrian guidance. Glaro's Elite Rail System embraces the timeless elegance and age old craftsmanship of fine metal for which Glaro is known. The tubular posts and rails are meticulously engineered and machined to create a precision rail-to-post connection. The heavy gauge satin polished aluminum components are coated with attractive finishes that blend perfectly with any existing facility design and enable Elite Rail to maintain its new look.

Take advantage of the ease with which an Elite Rail System can be rearranged, transported, or stored. No tools are required for assembly or reconfiguring. This design guarantees a handsome, stable, and durable system resulting in a permanent appearance and creates an effective security barrier. Glaro's Elite Rail System inhibits dangerous and disorderly situations while encouraging a safe and orderly environment.

**Easy to use Key hole design for precision rail-to-post connection**

**RP-14**
**Elite Single Rail Post**

### Function

- Elite Rail offers the appearance of permanence with the convenience and versatility of a portable pedestrian control system
- A more effective security and organizational barrier than any other portable system
- Elegant designer look appropriate for any location indoors and out
- Cost effective alternative to expensive welded railings that require an extensive installation process in concrete
- Sophisticated design fits into any contemporary or traditional décor
- Available in single and double rail systems
- Excellent for hotels and casinos, exhibition halls, lobbies, theaters, museums and galleries, security check in areas, auto showrooms, cashier stations, schools, teller and clerk windows, food service areas, transportation terminals, parking garages, government offices, motor vehicle departments etc
- Double Elite Rail is ADA compliant
- Utilize Elite signage to guide your visitors

### Safety and Stability

- Unsurpassed stability - heavy weighted 2.5" diameter portable posts have 14" diameter base weighted with 23 pounds of solid steel
- Downward pressure on rails is transferred to downward pressure on the posts for maximum stability. Solidly built 2" diameter rigid rails are machined to fit tightly onto posts to establish a formidable tamper resistant stable barrier even in high traffic areas

### Versatility

- Modular design makes it easy to reconfigure your system. Every post is ready for 4-way directional use
- Quick and easy installation - No tools required
- Quickly and easily disassembles for storage and transport
- Custom height posts and custom length rail are available upon request
- Order additional posts and rail to extend your system at any time

### Finishes

- All aluminum construction is rust and tarnish-proof
- Finishes available – satin aluminum, tarnish-proof satin brass, and 27 durable textured and smooth powder coat baked finishes. Ask for actual finish samples
- Create your own unique look to compliment your décor at no extra charge by using more than one finish for the rails and posts

### Maintenance and Care

- Maintenance free design – there are no moving parts
- Finishes are designed to conceal dirt and smudges
- Cleans with a damp cloth – no polishing or chemicals needed

### GO Glaro - Go Green- Elite Rail

- Made in the USA with recycled aluminum, steel, and packaging materials
- Elite rail is 100% post consumer recyclable
- No chemicals are required for cleaning

### Shipping

- Elite rail ships in 1 to 3 days
- Ships UPS at minimum freight cost
- Tubular parts are group packed to save freight costs

R-71 Series Sign Holder

RW-3 Series Wall Receptor

## How to Order Your Elite Rail Systems

1. Measure your area and layout your system on paper to determine the location of posts and the length of rails needed. It's best to keep the length of the rails as uniform as possible.
2. When ordering posts, order the RP24 posts for double rail systems and order the RP14 posts for single rail systems. Specify the finish code for the posts.
3. When ordering rails, order 2 rails for each space between RP24 posts and for a single rail system order 1 rail for each space between RP14 posts. Specify the finish code for the rails. (Custom lengths are available upon request.)
4. Order wall plates, sign frames, sign holders, and optional components as needed.

**Design Notes:**

All components of your system may match each other or you may mix and match finishes within a system to create a custom design that will complement your décor.

## ELITE POSTS

| Item | Description | Height | Post Dia | Base Dia | Wt |
|---|---|---|---|---|---|
| RP14 | Single Rail System, 4 Way Post | 36" | 2.5 " | 14" | 23 |
| RP24 | Double Rail System, 4 Way Post | 36" | 2.5 " | 14" | 23 |

**Optional High Impact Black Plastic ABS Bases (ABS-1) are Available at No Additional Cost.**

**Specify Finish Code from chart on the right.**

## ELITE RAILS - Custom Lengths are Available

| Item | Description | Rail Dia | Wt |
|---|---|---|---|
| R-3 | 3 ft Horizontal Rail | 2" | 3 |
| R-4 | 4 ft Horizontal Rail | 2" | 3 |
| R-5 | 5 ft Horizontal Rail | 2" | 4 |
| R-6 | 6 ft Horizontal Rail | 2" | 4 |

**Specify Finish Code from chart on the right.**

**Note: When ordering RP24 posts for double rail systems, make sure to order 2 rail lengths for each post. Order 1 rail length for each RP14 post for single rail systems. All rails have the same design and may be used in either upper or lower positions.**

## ELITE RAIL ACCESSORIES

| | | |
|---|---|---|
| RW-3 | Wall Plate, Receptor for Elite Horizontal Rails | 1 |
| R1114 | 11h x 14w Sign Frame for Elite Rail Post | 3 |
