RECYCLEPRO VALUE SINGLE PURPOSE RECYCLING RECEPTACLES - Inner Liner Can is NOT Included.

RECYCLEPRO VALUE SERIES, INDIVIDUAL UNITS are the next generation for recycling management. It is the only system of its kind. It is the largest, most diversified line of recycling receptacles offering an extensive selection of sizes, finishes, openings and silk screened messages. RecyclePro Individual Units allows you to create your own recycling station with one or more receptacles. The primary components are the 12", 15", and 20" diameter single purpose individual RecyclePro receptacles.

The basic distinguishing feature of the receptacles in the Modular System Series compared to the Glaro Recycle Pro I, II, and III Series, is that the need for an additional inner container has been replaced by using heavy gauge custom sized clear poly bags that are designed to have a snug fit. LB12, LB15, and LB20 poly bags are purchased separately. Poly bags are easily pulled over the top up to a clearly marked guide-line provided on the outside of each receptacle near the top. When the receptacle cover, which has an extra long overlap, is placed on the body, the poly bag is completely concealed and secured in place.

INDIVIDUAL UNITS for RECYCLEPRO VALUE SERIES

- The main component of Value Modular Stations is the individual receptacle which may be used as a single stand alone receptacle. Individual Units do not have the required factory installed holes and cannot be connected after you receive your order.
- Order LB12, LB15, or LB20 specially sized poly bags for these receptacles.
