# FEATURES AND BENEFITS
# RECYCLEPRO™ RECYCLING RECEPTACLES
## GENERAL INFORMATION

### GLARO – THE NUMBER ONE CHOICE FOR OVER 65 YEARS
We are pleased to introduce Glaro RecyclePro Recycling Receptacles, Bins, and Containers!
Never before has it been so simple to supply any facility with attractive and functional metal recycling receptacles from perhaps the largest and most diversified line of recycling receptacles available today! Glaro continues to earn a fine reputation for their attractive, functional, durable, and versatile products

### SUPER QUICK SHIP THAT CAN'T BE BEAT
Glaro is the only company with so many choices and can ship ALL of your average size orders in 1 to 3 days. All Glaro personnel are trained and understand that preparing and shipping your order is the most important task of each day.

### GLARO RECEPTACLES – BUILT GREEN
Great care is given to minimize waste in the manufacturing process of all Glaro receptacles. Only raw materials with recycled content are used in the manufacturing process. Glaro receptacles, themselves, are recyclable because they are constructed and packed for shipping with recycled materials. Please refer to the Glaro Green Statement available on this website.

### BODIES – BUILT TO LAST
Glaro All Weather Receptacles are designed for Indoor/Outdoor use. All outer bodies are protected from outdoor weather conditions by our special high temperature baked on powder coat finishes which are applied to galvanized steel or solid aluminum bodies. They are available in 12", 15", and 20" diameters. All bodies have rust and corrosion resistant aluminum bottoms.

### INTERIOR METAL LINER CANS
Heavy Gauge Galvanized Steel Inner Receptacles with aluminum bottoms (provided in all Glaro Recycling Receptacles except the Value Individual and Value Modular Station Collection) have a full lift-out handle for clean and easy emptying. The inner receptacles are, therefore, rust, corrosion, and fire resistant. For added fire prevention, Glaro products have no hazardous, toxic, or flammable plastic inner containers.

### COVERS
Glaro has the largest selection of shapes for openings and combinations of openings for single, double, and triple purpose receptacles. Heavy gauge solid aluminum tops are hand spun then satin polished. The finishes available for the tops/covers include Glaro's exclusive rust and tarnish proof Satin Brass, Satin Aluminum with a clear powder coat protective finish, or 27 colors from our selection of smooth and textured powder coat finish collection.

### ATTRACTIVE AND FUNCTIONAL OPENINGS IN THE COVERS
All units are supplied with heavy gauge, seamless, hand spun and hand polished aluminum covers to help insure that all Glaro indoor/outdoor Recycling Receptacles are durable as well as attractive. Choose from our large selection of shapes for each recycling opening on each cover, allowing visitors to efficiently and conveniently sort the recyclables in accordance with the waste streams designated in the local area. Create your customized recycling station!

### 29 FINISHES TO CHOOSE FROM
Glaro offers time tested tarnish-proof satin brass, satin aluminum with a clear baked coating, and 27 textured and smooth powder coated finishes which are baked onto the Glaro RecyclePro Recycling Receptacles. As a result the finishes are easily cleaned without using environmentally harmful chemicals.

### FIRE SAFETY
Glaro RecyclePro Recycling Receptacles provide the highest level of fire safety. Glaro gives you TWO layers of protection on most models effectively helping to contain and retard small fires because both inner and outer receptacles are heavy gauge metal. This double wall construction helps to contain heat and flames of a small internal fire.

### SILK SCREENED LOGOS AND MESSAGES
RecyclePro Recycling Receptacles have covers and bodies that are professionally silk screened with easy to read messages and logos that last indefinitely because Glaro has gone the extra mile to bake on the screened message. You may choose the message/logo for each opening of our recycling receptacles. Custom messages, multi-language messages, international symbols, and corporate/government logos are quickly and easily prepared to customize your RecyclePro Recycling Receptacles.

### CONTINUITY OF DESIGN
Glaro Recycling Receptacle designs and finishes coordinate perfectly with all other products manufactured by Glaro. Waste and ash receptacles, bellman carts, pedestrian control posts, sign equipment, and planters are often used in close proximity.

### MADE IN THE U.S.A. FOR OVER 65 YEARS
At the Glaro headquarters located in Hauppauge, Long Island, New York, the manufacturing facility works with a total in-house concept integrating the latest designs with meticulous engineering, the finest manufacturing, and quick shipping. Glaro is truly a manufacturer with all products made in the U.S.A. You will appreciate the consistency of quality and service.

### CREATIVE CUSTOMER SERVICE
More choices and possibilities than ever are available from Glaro. Glaro has the most professional and well-trained personnel to address every question and concern. We provide solid advice, assist with selecting products, suggest colors and message selection, and then rush product and shipping quotes to you. When custom imprinting is requested, our customer service experts will coordinate with the Glaro graphics department to provide custom art within 48 hours. In short, we provide customers with the utmost in care.
.

### THE MONTE CARLO OPTION
The "Monte Carlo" Banded, Waste Receptacles feature a stylish upscale and distinctively customized appearance. Thin, decorative bands with matching covers make these waste receptacles stand out from all others. As with all Glaro products, these waste receptacles are available in 27 powder coat finishes. (Please inquire)

### THE CANOPY TOP OPTION
Factory installed Canopy Tops can be added to all recycling covers. Canopies are the perfect solution when using Recycling receptacles outdoors, especially where exposed to inclement weather.

### INNOVATIVE NEW PRODUCTS TO LEAD THE INDUSTRY
Please stay up-to-date by watching the Glaro website at www.Glaro.com for new models of recycling receptacles and bins. Our smartly designed recycling receptacles have quickly become the favorite choice of commercial designers and purchasing agents who know about quality recycling receptacles.

Make Glaro RecyclePro Recycling Receptacles, recycling bins, and recycling containers your choice now!

# THE RECYCLEPRO CHOICES

# RECYCLEPRO™ RECYCLING RECEPTACLES

## THE COMPLETE COLLECTION

### RECYCLEPRO I, II & III

**RECYCLEPRO I – SINGLE PURPOSE RECEPTACLES**

RECYCLEPRO I is the original model that set the pace for the balance of the Glaro recycling lines. These models first gained notoriety when Glaro developed the recycling receptacles that ultimately became the standard for the U.S. Senate and the U.S. House of Representatives. This series includes a heavy gauge galvanized steel inner can and an aluminum bottom. RecyclePro I Receptacles are available in three different sizes and four different choices of top openings. Choose from a multitude of silk screened messages that are applied to the body of the receptacle and then baked on to ensure longevity.

**RECYCLEPRO II – DUAL PURPOSE RECEPTACLES**

RECYCLEPRO II provides 20" diameter receptacles designed to collect two types of recyclables. This series includes a heavy gauge galvanized steel inner container with an aluminum bottom. Five different openings in four different combinations will allow your facility to institute a recycling program with minimum space and cost. Each opening has a separate poly bag below that is designed to expand into more than 50% of the capacity as space allows. There is no rigid metal divider between bags. This "smart RecyclePro" product has a high efficiency factor which translates into less service and maintenance. Remember, more than one RecyclePro II unit may be used together if desired. They may be placed near a single purpose RecyclePro I or a triple purpose RecyclePro III unit. Yes, they are all part of the same family and are made to mix and match!

**RECYCLEPRO III – TRIPLE PURPOSE RECEPTACLES**

RECYCLEPRO III provides 20" diameter receptacles designed to collect three types of recyclables or two types of recyclables plus waste in a single receptacle. This series includes a heavy gauge galvanized steel inner container with an aluminum bottom. Five different openings are available in five possible combinations to allow your facility to easily implement an instant recycling program with minimal space and cost. Each opening has a separate poly bag below, supported by a special retainer system. Either 25%, 33% or 50% capacity is provided, as indicated on the product information chart, depending on the particular opening and model. Each bag is designed to expand into more than its designated capacity as space allows. Similarly to the RecyclePro II design, there is no rigid metal divider between bags. This "smart RecyclePro" product has a high efficiency factor which means that receptacles can be serviced less frequently, saving time and money. More than one RecyclePro III unit may be used together or along side of single and/or dual purpose RecyclePro II units. Yes, they are all part of the same family and can be mixed and matched to your individual taste!

### VALUE SINGLE PURPOSE INDIVIDUAL AND VALUE MODULAR CONNECTED STATIONS

**EASILY CREATE A CUSTOMIZED RECYCLING STATION WITH STOCK COMPONENTS FROM GLARO**

VALUE MODULAR is the next generation of recycling management. It is the only system of its kind. It is the largest, most diversified line of recycling receptacles offering an extensive selection of sizes, finishes, openings, silk screened messages, signage, and configurations to connect containers together. RecyclePro VALUE Modular Stations allows you to create your own recycling station with one or more receptacles**. When using more than one receptacle you can easily connect the receptacles together and add a connected sign post to encourage use of the station if you wish.** The primary components are the 12", 15", and 20" diameter single purpose individual RecyclePro receptacles.

**The basic distinguishing feature of the receptacles in the Value Single Purpose and Value Modular Station Series compared to the Glaro Recycle Pro I, II, and III Series, is that the need for an additional inner steel container has been replaced by using a heavy gauge custom sized clear poly bag** that is designed to have a snug fit. LB12, LB15, and LB20 poly bags are purchased separately. Poly bags are easily pulled over the top up to a clearly marked guide-line provided on the outside of each receptacle near the top. When the receptacle cover, which has an extra long overlap, is placed on the body, the poly bag is completely concealed and secured in place.

**VALUE SINGLE PURPOSE INDIVIDUAL UNITS for RECYCLEPRO**

The main component of the Value Modular Station System is the individual receptacle which may be used as a single stand alone receptacle. Individual receptacles do not have the factory installed holes in the side of the bodies that allow for them to be connected. Order LB12, LB15, or LB20 specially sized poly bags for your receptacles.

**VALUE MODULAR STATIONS CONNECTED UNITS**
***without a silk screened sign post***

When two or more recycling containers are used side by side they may be connected to each other in the sequence you specify. Each catalog number includes all the individual receptacles, hardware and connector brackets.

For the same cost you may select any type of Glaro opening for the top of each unit.

Also for the same cost you may specify any standard Glaro silk screened message for the front of each unit to indicate the intended use of the opening on the cover of the unit.

If you do not specify the order that you wish to have the units connected it will be determined by our staff. The necessary hardware and connector brackets are all included and are easily installed utilizing the holes provided at the factory when your order is being processed.

Any number of units may be connected to each other in a straight line. If three units are ordered you may connect them in a triangular or straight line configuration. If you have a preference as to the order in which the different openings are arranged please indicate this otherwise it will be determined at the factory.

Should you wish to a use an optional additional removable inner steel container, please inquire.

**VALUE MODULAR STATIONS CONNECTED UNITS**
***with a silk screened sign post***

A six foot high by 3.5 inch diameter sign post with mounting hardware for attaching to the receptacles is included when two or more recycling containers are used. When receptacles are used side by side they may be connected to each other in the sequence you specify. Each catalog number, in this section, includes the sign post and all the individual receptacles, hardware and connector brackets you need.

For the same cost you may select any type of Glaro opening for the top of each receptacle.

Also for the same cost you may specify any standard Glaro silk screened message for the front of each unit to indicate the intended use of the opening on the cover of the unit.

If you do not specify the order that you wish to have the units connected it will be determined by our staff. The necessary hardware and connector brackets are all included and are easily installed utilizing the holes provided at the factory when your order is being processed.

Any number of units may be connected to each other in a straight line. If three units are ordered you may connect them in a triangular or straight line configuration. If you have a preference as to the order in which the different openings are arranged please indicate this otherwise it will be determined at the factory.

Should you wish to a use an optional additional removable inner steel container, please inquire.
